5	Cross Referencing Metadata	8	0.15	1.2	
6	Regulatory Indicators Eudr	8	0.15	1.2	
7	Signs Of Alteration	8	0.1	0.8	
	Total Score			8.1	

## Detailed Verbal Analysis

Section	Observation
Layout & Formatting	The document closely follows the standard layout of Indonesian timber-measurement forms, including typical columns and headings such as 'Nomor Batang', 'Jenis Kayu', 'Panjang', 'Diameter', and 'Volume', but with a focus on export.
Language & Terminology	Language and terminology are consistent with industry standards, including abbreviations like 'M3' and relevant terms in Bahasa Indonesia.
Stamps & Signatures	Official stamps and a designated area for signatures are present, though the signature space remains incomplete.
Data Consistency & Accuracy	Measurements for volume, weight, and units appear consistent and plausible.
Cross Referencing & Metadata	Country of export and product descriptions indicate legitimate origins; 'Petak Tebangan No.' is absent, likely due to the export nature of this document.
Regulatory Indicators (EUDR)	Mentions of certification are present and align with regulatory expectations.
Signs of Alteration	No evident tampering or alterations detected upon inspection.
Overall	Overall, authenticity is strong; completing the signature section would further improve confidence.
